DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 in part, drawn to compounds and pharmaceutical compositions wherein one of X is a bond and Y is a N or O or S (forming a 5 membered ring), and $p + n$ is 3 (forming a six membered ring), and R2 or R3 is a pyran or a piperidine or an oxazolidinyl classified in class 546, subclass 80, 84
- II. Claims 1-10 in part, drawn to compounds and pharmaceutical compositions wherein one of X is a bond and Y is a N or O or S (forming a 5 membered ring), and $p + n$ is 3 (forming a six membered ring), and R2 and R3 is an alkyl group classified in class 546 and 514 and various subclasses.
- III. Claims 11-15 in part, drawn to method of treating diseases, classified in class 514 in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II have a different core and have different properties and hence are **independent and distinct**.

Art Unit: 1625

Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of using the compounds to treat inflammation and , cancer , ocular diseases can be done by other drugs available.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III , restriction for examination purposes as indicated is proper.

The search is burdensome to the PTO.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr Saliwanchik on 5/20/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1625

Applicants preserve their right to file a divisional on the cancelled non-elected subject matter without prejudice in due course.

If applicant 's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art , the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rita J. Desai whose telephone number is 571-272-0684. The examiner can normally be reached on Monday - Friday, 9:30 am to 6:00 pm.
